

More New Products from ToolingDocs

ToolingDocs works continuously to find ways to help mold builders, molders and OEMs get the best production performance from their molds. Part of this is accomplished through the introduction of a new line of Tooling Innovations.

At NPE2015 ToolingDocs wowed attendees with its new **Toolroom Maintenance Bench** (featured in last month's TD News), along with the following advantageous, new products:

ToolingDocs introduces an array of new products that, like the Certification training courses, advance mold maintenance efficiencies and reduce costs.

- **Mold Light Bar** – Mold Light Bar features six LED floodlights for illuminating hard-to-see areas at the molding press.
- **Mold Status Tags** – Magnetic Tags are color-coded for easy ID of a mold's status with just a glance. Six styles available.
- **Synthetic Mold Grease** – Premium Synthetic Mold Grease provides superior lubrication for sliding or moving components within molds and tooling.

See, Learn from ToolingDocs at Amerimold

See new products and pick up some valuable maintenance tips from the ToolingDocs team at this year's Amerimold Expo, which will be held on June 17-18 in Rosemont, Illinois.

First, cruise the **Mold Maintenance Highway** (Booths 406-418). You'll find ToolingDocs in booth #408 and more companies with products dedicated to mold maintenance and repair.

In addition, be sure you're registered for a special ToolingDocs workshop that will be held on Thursday, June 18, from noon-4 p.m. Titled "Making Maintenance Profitable", the ToolingDocs team will use hands-on exercises and in-depth discussion to present a two-part class - one on reducing costs related to unscheduled mold repair and how to work more effectively on commonly used hot runner systems.

Register for Amerimold and use **PROMO CODE: PCIC** for your free exhibit hall pass and 50% off conference and workshop sessions compliments of ToolingDocs.
