Tour ToolingDocs

Tour our training facility and learn how we can help streamline mold maintenance processes and increase efficiencies.

Hot Runner Repair

Through this course, technicians will learn solid, maintenance practices in the care and feeding of hot runner tools.

Customer Testimonials

Listen to past attendees talk about the benefits of mold maintenance training and what they gained from ToolingDocs.

ToolingDocs to Exhibit and Speak at Amerimold 2016

ToolingDocs and several Tech Partners will be stationed along the **Mold Maintenance Highway** (booths 705 through 721) at this year's Amerimold Expo, June 15-16 at the Suburban Collection Showcase in Novi, Michigan.

Stop by our booth, #711, to learn about our exciting new line of maintenance products and training courses, then cruise down the Highway for more companies with products dedicated to mold maintenance and repair.

In addition, ToolingDocs' experts Steve Johnson and Glenn Keith will speak at the Maintain Track of the conference sessions, on Wednesday, June 15th, at 10:00 am. Their presentation, "**What You Need to Know About Hot Runner Repair**", will cover the issues that plague in-house manifold maintenance and repair toolrooms, and provides insight on how to be better prepared for this type of work while positioning your shop for future growth at a higher skill level, as molds become more complex.
