

Mold Maintenance Certification Training

Level 1 Mold Repair

The ToolingDocs Level 1 Mold Repair Certification is a two-day course that features in-depth, hands-on bench work and classroom training designed to provide attendees with effective, systemized mold maintenance skills, most of which may be put into practice immediately after completing the curriculum. Attendees will learn the following valuable skills:

- Eight Stages of Systemized Mold Maintenance
- Mold disassembly practices and techniques
- How to develop and implement an effective mold maintenance plan
- Basic mold terminology, shop and bench setup considerations, mold tooling component inspection and more.

Toolroom Maintenance Manager

This program teaches attendees the principles of RCM (Reliability Centered Maintenance) strategies and how repair technicians can apply them on a daily, troubleshooting basis. It also shows how managers and supervisors can apply these principles to easily set goals for measurement of continuous improvement initiatives. Attendees will learn how to:

- Recognize the differences and advantages of RCM (Reliability Centered Maintenance) techniques as it applies to mold maintenance
- Benchmark critical KPI's for mold performance and maintenance efficiency
- Effectively use your computerized maintenance management system (CMMS)
- Move away from the "firefighting" maintenance culture of the past

Maintenance managers will learn to lead their teams using the latest, most effective systems and processes.

Learn proper shop design and layout features along with benefits and systems costs.

- Justify and utilize new mold cleaning technologies and processes
- Improve shop layout, tools and techniques
- Begin training the team – how to start
- Propose improvements to upper management

“This is a program our industry needs. The things learned in this program can help companies regain a competitive edge and improve the economies of our companies.”

~ Jeff Dininger, Automation Plastics

Who Should Attend?

The **Level 1 Certification** is ideal for Molding Managers, Tooling Engineers, Process Technicians, and mold maintenance personnel who want to increase their knowledge of mold repair practices in a systemized maintenance structure within a molding plant.

The **Toolroom Maintenance Manager** is ideal for experienced Molding Managers, Tooling Engineers and mold maintenance personnel who desire more in-depth training in managing a busy mold repair shop. It's also suitable for those who previously completed the ToolingDocs Level 1 and Level 2 Certification programs. Qualified attendees will gain the tools necessary to effectively “change the culture” within his/her operations.

Where is the training held?

The Certification Training Programs listed below will be held at:

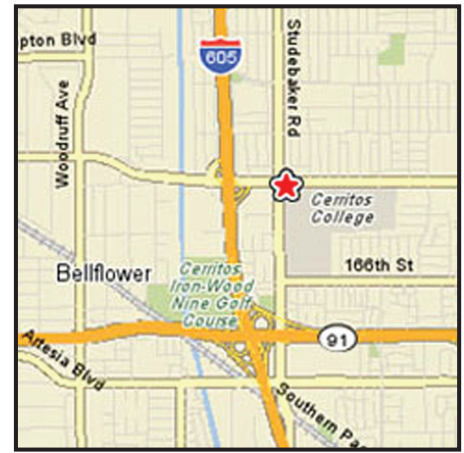

Cerritos College
Plastics Manufacturing Department 11110
Alondra Blvd.
Norwalk, CA 90650

Potential students can call ToolingDocs at 1-800-257-8369 to register today, or complete the registration form below and fax to 1-800-462-6653.
